

**GNP Ceramics, LLC**

## Technical Data

# Green Silicon Carbide Milling Media

### Typical Chemistry

Silicon Carbide (SiC) > 99.9%

### Physical Characteristics

Crystal Form: Hexagonal (Alpha SiC)  
True Density: 3.21 g/cm<sup>3</sup>  
Bulk Density: >2.0 g/cm<sup>3</sup>

### Sizing

1-5mm

### *Green Silicon Carbide Milling Media*

#### Description:

*This coarse Green Silicon Carbide is specifically milled to single crystals and specific shape to maximize bulk density, toughness, and grinding efficiency.*

#### Application:

*GNP Ceramic's Single Crystal Milling Media is used to further mill Silicon Carbide powders to obtain specific surface areas.*

#### Contact us:

*8500 Roll Rd  
Clarence Center, NY 14032  
phone 716-406-2222  
fax 716-406-2226*
